Forecast for Tuesday 20 Apr 2021

Weather: Dry with a few clear spells during the early hours of Monday, with a few short lived mist patches in the valleys around dawn. Areas of high cloud are expected throughout the day, but still with some warm spells of hazy sunshine. Some lower cloud will bubble up late morning onwards, this perhaps giving the odd light shower in the afternoon. Dry but cloudy through the evening.

Chance of cloud free mountain/hill tops above 600m: 100%.

Visibility: Any valley mist may briefly obscure views of nearby hills first thing, but otherwise visibility will be generally excellent with distant hills and landmarks visible.

Forecast for Wednesday 21 Apr 2021

Weather: Cloudy with some spells of light drizzle during the early hours and at first Wednesday morning, and with fog shrouding many of the higher routes. It should become dry during the afternoon, with cloud lifting and breaking to leave a fine evening with clearing skies.

Maximum wind: East 20-25 mph.

Chance of cloud free mountain/hill tops above 600m: 100% deteriorating to 30% or less during the early hours as areas of low cloud develop on slopes above 500-700m. Improving to 100% by early afternoon, with any lingering cloud holding clear of the summits through the rest of the day.

Visibility: Poor at times during the early hours and at first Wednesday morning, with any drizzle making views across valleys appear rather misty, and with cloud covering many slopes above 500-700m. Improving to be generally good by midday as cloud lifts to 800m, and becoming excellent by late afternoon with any patchy cloud well clear of the summits.

Temperature: **Valleys:** Plus 5 Celsius becoming plus 12 Celsius.
At 600m: Plus 7 Celsius becoming plus 3 Celsius.
Freezing level: Above the summits falling to 900m late in the evening.
